1. Product Overview

Stitching Manager Pro

Your complete business management solution

1.1 What is Stitching Manager Pro?

Stitching Manager Pro is a professional, all-in-one business management software designed specifically for tailoring shops, boutiques, fashion designers, and stitching units. It helps you manage every aspect of your business — from taking orders and tracking production to managing customers, calculating costs, and generating reports — all in one place.

The software works on any device — your mobile phone, tablet, or desktop computer — without installing anything. Just open it in your browser and you're ready to go.

1.2 Key Benefits

- Never lose track of an order again — see every order's status at a glance
- Save customer measurements permanently — no more paper registers
- Know exactly how much profit you make on every garment
- Your entire team works from the same system — no confusion
- Works offline and can be installed like a phone app (PWA)
- Fully secure — each user has their own login with role-based access
- Built-in AI chatbot to answer customer questions automatically

1.3 Main Modules

Module	Description
 Dashboard	Live overview of orders, revenue, and key metrics
 Board	Visual Kanban board to track order progress through stages
 Orders	Create, edit, and manage all customer orders
 Customers	Customer profiles, measurements, and order history
 Reports	Detailed sales, tailor, and garment analysis reports
 Log	Complete audit trail of all actions in the system
 Cost Estimator	Calculate fabric, labour, overhead costs and set selling price
 Settings	Configure shop profile, users, rates, and preferences

1.4 User Roles

The system supports four built-in roles, each with different levels of access:

Role	Access Level
 Admin	Full access to everything — the shop owner or head manager
 Manager	Can manage orders, customers, and payments. Cannot manage users
 Sales	Can add and edit orders and customers. Limited financial access
 Tailor	Can only see their assigned orders and update stage status

1.5 Business Workflow

Here is how a typical order flows through the system:

1. Customer visits the shop → Order is created with measurements and delivery date
2. Order appears in 'Received' column on the Board
3. Fabric is cut → Tailor moves the order to 'Cutting'
4. Stitching begins → Order moves to 'Stitching'
5. Garment is ready → Order moves to 'Ready'
6. Trial fitting (optional) → Order moves to 'Trial'
7. Order collected → Order moves to 'Delivered'
8. Payment received → Order moves to 'Paid ✓'

1.6 Order Stages

Stage	Meaning
 Received	Order has been taken from the customer
 Cutting	Fabric is being cut as per measurements
 Stitching	Garment is being stitched by the tailor
 Ready	Garment is ready for collection or trial
 Trial	Customer has come for a fitting/trial

 Delivered	Order has been handed over to the customer
 Paid ✓	Full payment has been received

 **Tip:** You can move an order to any stage at any time. The system automatically sends WhatsApp notifications when stages change.

2. Getting Started

Getting Started

Set up your account in minutes

2.1 Opening the Application

Stitching Manager Pro runs in your web browser. Your service provider will give you a web address (URL) like:

<https://threads.himanshurajput.com/>

You can open this on your phone, tablet, or computer. No installation is needed.

 **Tip:** For the best experience on your phone, tap the 'Install App' button when it appears. This adds the app to your home screen and it works just like a regular app.

2.2 First-Time Registration

The very first person to register automatically becomes the Admin. Follow these steps:

9. Open the application URL in your browser
10. You will see the login screen with the shop name and a sign-in form
11. Click 'First time? Create account →' at the bottom of the form
12. Enter your Email address and choose a Password (minimum 6 characters)
13. Click 'Create Account'
14. Check your email inbox for a confirmation email and click the link inside
15. Return to the app and sign in with your email and password

 **Note:** The first person to register will automatically be assigned the Admin role. All other users who register afterwards will be given the Tailor role by default. The Admin can change their role later.

[Screenshot: **Login screen showing the sign-in form with email and password fields**]

2.3 Signing In

To sign in each time you use the app:

16. Open the application URL
17. Enter your Email and Password
18. Click 'Sign In'
19. You will be taken to the Dashboard (Admin) or Board (other roles)

There are two ways to sign in:

- Email Sign In — use your email address and password
- Mobile Sign In — use your 10-digit mobile number and password (only if Admin has added your mobile number)

💡 Tip: Click the eye icon (👁️) next to the Password field to show or hide your password as you type.

2.4 Setting Up Your Shop Profile

After your first login, go to Settings → Shop Profile and fill in your shop details:

20. Shop Name — your business name as it will appear on receipts and reports
21. Owner Name — the owner's full name

22. Phone Number — your shop contact number
23. WhatsApp Number — for customer notifications (can be same as phone)
24. Email — your business email address
25. Website — your website (optional)
26. City — your city name
27. Full Address — your complete shop address
28. Upload Logo — click 'Upload Logo' to add your shop's logo (PNG or JPG)
29. Click 'Save & Sync Shop Settings' to save

 **Tip:** Your shop name appears on all printed order receipts. Set it correctly before printing any receipts.

2.5 Forgot Password

If you forget your password:

30. On the login screen, click 'Forgot password?'
31. Enter the email address you registered with
32. Click 'Send Reset Email'
33. Check your inbox for the reset email and click the link
34. Enter your new password and save

2.6 Installing as a Mobile App

Stitching Manager Pro can be installed on your phone like a regular app:

- On Android: Tap the menu button in Chrome, then 'Add to Home Screen' or tap the 'Install App' button in the app
- On iPhone: Tap the Share button in Safari, then 'Add to Home Screen'

 **Tip:** Installing the app means you can open it directly from your home screen without typing the URL every time. It also works better offline.

3. Dashboard

Dashboard

Your business at a glance

3.1 Dashboard Overview

The Dashboard is the first thing you see after logging in as Admin or Manager. It gives you a quick visual summary of your entire business — orders, revenue, and performance — all in one place.

3.2 Summary Cards

At the top of the Dashboard, you will see coloured cards showing key numbers:

Card	What it shows
 Active Orders	Number of orders currently in progress (not yet fully paid)
 Overdue	Orders past their delivery date that are not yet delivered
 Ready	Orders that are stitched and ready for collection
 Today's Revenue	Total amount received as payment today
 Today's Orders	Number of new orders received today
 Total Customers	Total number of customers in your database

3.3 Quick Actions

From the Dashboard, you can quickly:

- Click '+ New Order' to create a new order immediately
- Click on any summary card to see related orders
- Click the notification bell  to see pending alerts
- Use the search bar at the top to find any order by name, mobile, or order ID

 **Tip:** The order search bar at the top works from any screen. Just type a customer's name or phone number to instantly find their order.

3.4 Notifications

The bell icon  at the top right shows alerts. Click it to see:

- Urgent Orders — orders that are overdue or ready for collection
- Stage Updates — when a tailor moves an order to a new stage

Unread notifications show a red number badge on the bell icon. Click 'Clear All' to dismiss all notifications.

4. Board Module

Board Module

Visual order tracking with Kanban workflow

4.1 What is the Board?

The Board is a visual way to see all your orders organised by their current production stage. Each stage is shown as a column, and each order appears as a card inside the column. At a glance, you can see exactly where every order stands in your workshop.

4.2 Order Stages on the Board

Orders flow from left to right through these stages:

- Received — New order just taken from customer
- Cutting — Fabric is being cut
- Stitching — Garment is being stitched
- Ready — Garment is finished and ready
- Trial — Customer is doing a fitting
- Delivered — Given to the customer
- Paid ✓ — Full payment received

4.3 Moving an Order to the Next Stage

To advance an order to the next stage:

35. Find the order card on the Board
36. Tap or click the order card to open the order details
37. Click the stage button (e.g., 'Move to Cutting') at the bottom of the order panel
38. Confirm the stage change

Or, on the Board directly:

39. Each order card shows a forward arrow (→) button
40. Click it to move the order one stage forward

Tip: When an order moves to 'Ready', the customer will automatically receive a WhatsApp message (if WhatsApp notifications are configured).

Note: Only users with 'Change Stage' permission can move orders between stages. By default, this includes all roles including Tailor.

4.4 Understanding Order Cards

Each card on the Board shows:

- Order ID (e.g., SOR-240601-001)
- Customer name and mobile number
- Delivery date
- Total amount and balance due
- Assigned tailor name
- Number of garments

Cards that are overdue (past delivery date) are highlighted in red so you can spot them immediately.

4.5 Filtering the Board

At the top of the Board, you can filter orders by:

- Tailor — see only orders assigned to a specific tailor
- Date — filter by delivery date
- Search — search by customer name or order ID

Tip: Use the tailor filter every morning to show each tailor only their assigned orders. This keeps the workshop organised.

4.6 Mobile vs Desktop Board

On desktop, all stage columns are shown side by side. On mobile, you see one column at a time with tabs to switch between stages — this makes it much easier to use on a small screen

5.1 Creating a New Order

To create a new order, click the '+ New Order' button at the top right of the screen. You will see the New Order form. Fill in the following details:

Basic Information

Field	Description
Customer Name *	Full name of the customer (required)
Mobile Number *	10-digit mobile number (required — used for WhatsApp notifications and finding customer history)
Delivery Date *	When the order should be ready (required)
Assigned Tailor	Which tailor will stitch this order (optional)
Special Instructions	Any special notes, e.g., 'Add embroidery on collar', 'Customer wants loose fitting'

Adding Garments

Every order must have at least one garment. Click 'Add Garment' and fill in:

Field	Description
Garment Type	Select from the rate card (e.g., Simple Suit, Blouse, Lehenga)
Lining	None / Simple / Half Lining / Full Lining
Quantity	Number of pieces (usually 1)
Rate	Auto-filled from Rate Card — you can change it if needed
Amount	Auto-calculated (Rate × Quantity)

Payment Details

Field	Description
Total Amount	Auto-calculated from all garments
Advance Paid	Amount received today as advance payment
Balance Due	Auto-calculated (Total minus Advance)

Measurements

If the customer has measurements already saved in the system, they will auto-fill. You can also enter new measurements directly on the order form. Fields include:

Length • Breast • Waist • Hip • Sleeve • Golayi • Front Neck • Back Neck • Teera • Mohri • Calf • Thighs • Aasan

 **Tip:** If a customer's measurements are already in the system from a previous order, they will automatically appear when you enter their mobile number. No need to re-measure.

5.2 Saving an Order

41. After filling all required fields, click 'Create Order'
42. The order is saved and a unique Order ID is generated (e.g., SOR-240601-001)
43. The order appears on the Board in the 'Received' column

 **Tip:** Print the order receipt by opening the order and clicking the Print button. Give a copy to the customer as proof.

5.3 Editing an Order

44. Find the order in the Orders list or on the Board
45. Click on the order to open the Order Panel
46. Click the ' Edit' button
47. Make your changes
48. Click 'Save Changes'

 **Note:** Only users with 'Edit Order' permission (Admin, Manager, Sales) can edit orders. Tailors cannot edit orders.

5.4 Deleting an Order

49. Open the order
50. Click the ' Delete' button
51. A confirmation dialog will appear — click 'Yes, Delete' to confirm

 **Important:** Deleting an order is permanent and cannot be undone. The order is removed from the system completely.

5.5 Recording a Payment

52. Open the order
53. Click '💰 Record Payment'
54. Enter the amount received
55. Select payment mode (Cash / UPI / Card / Cheque)
56. Add a note (optional)
57. Click 'Save Payment'

The system will:

- Update the balance on the order
- Move the order to 'Paid ✓' stage if balance becomes zero
- Add loyalty points for the customer (if Loyalty Program is enabled)

⚠️ **Note:** Only Admin and Manager can record payments. Sales and Tailor roles cannot.

5.6 Searching for an Order

Use the search bar at the top of the screen. You can search by:

- Customer name
- Mobile number
- Order ID (e.g., SOR-240601-001)
- Tailor name

5.7 Filtering Orders (Orders List View)

In the Orders tab, you can filter orders by:

- Garment type (Suit, Blouse, Lehenga, etc.)
- Order status / stage
- Assigned tailor
- Date (This Month, Custom Range)

You can also export filtered orders to Excel for your records.

5.8 Printing an Order Receipt

58. Open the order from the Board or Orders list
59. Click the '🖨️ Print' button in the Order Panel
60. Your browser's print dialog will open
61. Select your printer and click Print

💡 **Tip:** The receipt shows the shop name, logo, customer details, garment list, measurements, and payment summary. Always give a receipt to the customer.

5.9 Importing Orders from Excel

To import a large number of orders at once from an Excel or CSV file:

62. Click the ' Import' button in the top bar
63. Download the sample template to see the correct column format
64. Fill in your orders in the template
65. Upload the file
66. Review the preview and confirm the import

6. Customer Management

Customer Management

Build and manage your customer database

6.1 Customer Module Overview

The Customers module keeps a complete record of every customer — their contact details, measurements, order history, loyalty points, and notes. Over time, this becomes your most valuable business asset.

6.2 How Customers are Added

Customers are added automatically when you create a new order. You can also:

- Add a customer manually from the Customers screen
- Search for an existing customer to view their profile

Tip: Every time you create an order, the system checks if the mobile number already exists. If yes, it links the order to the existing customer. If not, a new customer profile is created automatically.

6.3 Viewing a Customer Profile

67. Go to the Customers tab from the sidebar
68. Search by name or mobile number
69. Click on a customer to open their full profile

The profile shows:

- Name, mobile, and contact information
- All previous orders and their status
- Saved measurements
- Total spent and loyalty points balance
- Loyalty tier (Bronze / Silver / Gold / Platinum)

6.4 Editing a customer

70. Open the customer's profile
71. Click 'Edit'
72. Update the name, mobile, or notes
73. Click 'Save'

6.5 Saved Measurements

When measurements are taken for any order, they are automatically saved to the customer's profile. Next time the same customer places an order, their measurements auto-fill. This means:

- No need to re-measure regular customers
- Measurements are always accurate and consistent
- You can view measurement history to see if anything has changed

6.6 Loyalty Points

The Loyalty Program rewards customers for their business:

Action	Reward
Earn Points	Customers earn 5 points for every ₹100 spent (configurable)
Order Bonus	10 extra points when an order is created
Delivery Bonus	20 extra points when an order is delivered
Redeem Points	Every 100 points = ₹10 discount on future orders
Tier	Required Points
 Bronze	0 – 499 points earned (all customers start here)
 Silver	500 – 1,999 points earned
 Gold	2,000 – 4,999 points earned
 Platinum	5,000+ points earned

 **Tip:** Higher tier customers get special treatment. You can see a customer's tier on their profile and in the order panel.

6.7 Creating a New Order for a Customer

From a customer's profile, click 'New Order' to instantly create a new order with their details and measurements pre-filled.

6.8 Deleting a Customer

74. Open the customer's profile
75. Click 'Delete Customer'
76. Confirm the deletion

 **Important:** Deleting a customer also removes their measurements and loyalty history. Their past orders remain in the system.

7. Measurement Management

Measurements

Save and reuse customer measurements

7.1 Measurement Fields

The system supports the following measurement fields for each customer:

Field	Description
Length	Total length of the garment from shoulder to hem
Breast	Chest/bust measurement around the fullest part
Waist	Measurement around the natural waistline
Hip	Measurement around the fullest part of the hips
Sleeve	Length from shoulder to wrist
Golayi	Round measurement — varies by garment type
Front Neck	Depth of neckline at the front
Back Neck	Depth of neckline at the back
Teera	Width of the collar/neckline opening
Mohri	Cuff width at the wrist end
Calf	Measurement around the calf (for pants/salwar)
Thighs	Measurement around the thighs
Aasan	Seat measurement (for pants/salwar)

7.2 Adding Measurements

Measurements can be entered in two places:

- During Order Creation — scroll down to the Measurements section in the New Order form
- From Customer Profile — click on a customer and edit their measurements directly

77. Take the customer's measurements with a measuring tape
78. Enter each value in the corresponding field (in inches)
79. Click Save

 **Tip:** Measurements are saved in inches by default. Be consistent — always measure the same way for the same customer.

7.3 Reusing Measurements

When creating a new order for a returning customer:

80. Enter the customer's mobile number in the order form
81. If the customer exists, their saved measurements auto-fill
82. Review the measurements and update any that have changed
83. The updated measurements are saved back to the customer profile

7.4 Custom Measurement Fields

Admin can add or remove measurement fields to match your specific needs:

84. Go to Settings → Measurements
85. Type a new field name (e.g., 'Knee Length') and click 'Add Field'
86. To remove a field, click the × next to it

⚠ Note: Custom field changes apply to all new orders. Existing saved measurements are not affected.

7.5 Requiring Measurements

In Settings, you can turn on the 'Require Measurements' toggle. When enabled, the system will show a warning if an order is saved without measurements. This helps ensure no order is processed without taking measurements first.

8. Cost Estimator Module

Cost Estimator

Know your costs and set the right price

8.1 What is the Cost Estimator?

The Cost Estimator helps you calculate the actual cost of stitching any garment — including fabric, accessories, tailor charges, and overheads. It then shows you your profit based on the selling price you set. This is an essential tool for pricing your work correctly.

 **Tip:** Always use the Cost Estimator before quoting a price to a customer. It ensures you never sell at a loss.

8.2 Creating a Cost Sheet

87. Click '💰 Cost' in the left sidebar
88. Click '+ New Cost Sheet'
89. Fill in the Basic Information:
 - Cost Sheet Number — auto-generated (e.g., CS-20260601-123)
 - Date — today's date (auto-filled)
 - Customer Name and Mobile (optional)
 - Product Name — e.g., 'Silk Suit'
 - Category — e.g., 'Bridal', 'Casual', 'Formal'
 - Notes — any special remarks

8.3 Material Expenses

Click '+ Add Row' in the Material Expenses section to add each item:

Field	Description
Item Name	What you're buying (e.g., 'Silk Fabric', 'Buttons', 'Lace')
Quantity	How much (e.g., 2.5 for 2.5 metres)
Unit	Metre / Piece / Gram / Set etc.
Rate (₹)	Price per unit
Amount	Auto-calculated (Quantity × Rate)

Common material items:

- Fabric (main cloth) — e.g., 2.5 Metres @ ₹300 = ₹750
- Lining Fabric — e.g., 2 Metres @ ₹80 = ₹160
- Buttons — e.g., 8 Pieces @ ₹5 = ₹40
- Hooks — e.g., 4 Pieces @ ₹3 = ₹12
- Dori (drawstring) — e.g., 1 Metre @ ₹20 = ₹20
- Latkan (tassel) — e.g., 2 Pieces @ ₹25 = ₹50
- Embroidery/Stone Work — fixed amount e.g., ₹200
- Packing materials — e.g., ₹15

8.4 Tailor Charges

In the Tailor Charges section, add each tailor's contribution:

90. Click '+ Add Tailor'
91. Enter the Tailor's Name
92. Enter the Charge amount (₹)

You can add multiple tailors if the work is split (e.g., one for cutting, one for stitching).

8.5 Overhead Costs

Overheads are the indirect costs of running your shop. Add them in the Overheads section:

- Electricity — allocated share of monthly electricity bill
- Machine Maintenance — monthly machine service cost divided by number of orders
- Rent Allocation — monthly rent ÷ average orders per month
- Staff Salary Allocation — non-tailor staff cost allocation
- Miscellaneous — any other costs

 **Tip:** To calculate per-order overhead: take your total monthly overhead and divide by the average number of orders per month. Add this fixed amount to every cost sheet.

8.6 Setting the Profit

Choose how you want to add profit:

- Percentage Mode — enter a profit percentage (e.g., 30%). The system calculates the profit amount automatically
- Fixed Amount Mode — enter a fixed profit amount in rupees

8.7 The Live Summary Panel

On the right side (or below on mobile), you will see the Live Summary Panel that updates as you type:

Line Item	Calculation
Material Cost	Total of all material expenses
Tailor Cost	Total of all tailor charges
Overhead Cost	Total of all overhead items
Total Expense	Material + Tailor + Overhead
Profit	Your profit amount
Final Selling Price	Total Expense + Profit
Profit Margin %	Profit as a percentage of Selling Price

8.8 Saving and Using a Cost Sheet

Two save options are available:

-  Draft' — save as a draft to work on later
-  Save Final' — save as the final, confirmed cost sheet

Once saved, you can:

- Print the cost sheet (opens a formatted print layout)
- Duplicate it for a similar garment
- Edit it if costs change

8.9 Worked Example

Item	Amount
Silk Fabric (2.5m @ ₹350)	₹875
Lining (2m @ ₹80)	₹160
Buttons (8 @ ₹5)	₹40
Hooks (4 @ ₹3)	₹12
Embroidery Work	₹300
Tailor Charge	₹600
Electricity Overhead	₹30
Total Expense	₹2,017
Profit (30%)	₹605
Final Selling Price	₹2,622

 Tip: Quote ₹2,700 to round up to a nice number while keeping your margin. The system gives you the base calculation — you decide the final price.

8.10 Cost Analytics

Click ' Analytics' in the Cost Estimator to see:

- Total revenue quoted vs total expenses
- Average profit percentage
- Tailor-wise cost breakdown
- Expense category breakdown (fabric, labour, overheads)
- Highest and lowest profit products

9. Reports Module

Reports Module

Analyse your business performance

9.1 Reports Overview

The Reports module provides detailed analysis of your business performance. Use it to understand your revenue, identify your best-selling garments, track tailor performance, and manage outstanding payments.

[Screenshot: **Reports screen showing tabs for Monthly P&L, Tailor Report, Garment Analysis, and more**]

9.2 Monthly P&L Report

The Monthly Profit & Loss report shows:

- Total orders received in the selected period
- Total revenue collected
- Outstanding balance (money not yet collected)
- Average order value
- Daily revenue chart for the month

To use:

93. Select 'Monthly P&L' from the report tabs
94. Choose the month and year
95. Review the summary and chart
96. Click 'Export Excel' to download the data

9.3 Tailor Performance Report

See how much work each tailor has handled:

- Number of orders completed per tailor
- Total value of orders assigned
- Average completion time

 **Tip:** Use this report to fairly distribute work and to decide on tailor bonuses or incentives.

9.4 Garment Analysis Report

Understand which garments are your most popular and profitable:

- Most ordered garment types
- Revenue by garment type
- Average price per garment

9.5 Balance Aging Report

Track outstanding payments — money that customers owe you:

- Orders with balance due
- Sorted by oldest outstanding balance first
- Customer name and contact for follow-up

💡 Tip: Review the aging report every week to follow up on pending payments. Click on any customer's order to record a payment.

9.6 Customer Report

Analyse your customer base:

- Top customers by total spending
- New customers this month
- Returning customer rate

9.7 Pending Orders Report

See all orders that are not yet complete:

- Overdue orders highlighted in red
- Orders by stage
- Estimated revenue when orders complete

9.8 Exporting Reports

All reports can be exported:

-  Excel — download as a spreadsheet for detailed analysis
-  Print — print directly from the browser

💡 Tip: Export your monthly report at the end of each month and save it for your records.

9.9 Date Filters

Use the filter buttons to select different time periods:

- This Month — current calendar month
- Custom Range — select any start and end date
- Filter by garment type, tailor, or order status

10. Settings Module

Settings Module

Configure your shop and system preferences

10.1 Navigating Settings

Click '⚙️ Settings' in the left sidebar to open Settings. On the left, you will see the Settings submenu with all available sections. Click any section name to go directly to it.

The screenshot displays the 'Settings' module interface. At the top, there's a header bar with the Swaroop Threads logo, status indicators (LIVE, ADMIN, connect), and counts for Active (2), Overdue (0), and Ready (0) items. A search bar and buttons for 'Install' and '+ New Order' are also present. Below the header, a navigation bar shows various modules: Dashboard, Board, Orders, Customers, Reports, Log, and Settings (which is currently selected). The main content area is divided into two sections. The first section, titled 'ACCOUNT', contains a status bar indicating 'Connected to Supabase' with the URL 'https://opdtlnxtolnmuxawayhn.supabase.co'. Below this, there are buttons for 'Sign Out' and 'Reconfigure Supabase'. The second section, titled 'SAAS INFO', displays system details in a table format:

SAAS INFO	
Product	Stitch Manager Pro
Version	6.0
Build	April 2026
License	SaaS-Ready

10.2 Shop Profile

Configure your shop's basic information:

- Shop Name — appears on all receipts and reports
- Owner Name — owner's full name
- Phone Number — shop contact number
- WhatsApp Number — for customer notifications
- Email and Website
- GST Number — for GST-registered shops
- City and Full Address
- Shop Logo — upload PNG or JPG (max 5MB)

 **Tip:** Your shop name and logo appear on every printed order receipt. Set these up correctly from day one.

10.3 Rate Card

The Rate Card is your pricing list. It has all garment types with three pricing tiers:

Tier	Description
Simple Lining (s)	Basic stitching with no lining
Half Lining (h)	Garment with half lining inside
Full Lining (f)	Garment with full lining inside

Default Rate Card (customise as needed):

Garment	Simple / Half / Full Lining
Pant Suit	₹700 / ₹1,000 / ₹1,400
Pallazo Suit	₹600 / ₹1,000 / ₹1,400
Simple Suit	₹600 / ₹1,000 / ₹1,300
Simple Kurti	₹400 / ₹600 / ₹900
Pant	₹350 / ₹600 / ₹900
Simple Blouse	₹800 / ₹850 / ₹1,500
Designer Blouse	₹1,000 / ₹1,800 / ₹2,500
Lehenga	₹1,200 / ₹1,800 / ₹2,500
Saree Fall/Piko	₹120 (all tiers)

To update rates:

97. Click 'Edit' next to any garment
98. Change the Simple, Half Lining, and Full Lining prices
99. Click 'Update'
100. Changes are saved to the cloud and available on all devices

10.4 Tailors

Manage your list of tailors:

101. To add a tailor: Type the tailor's name in the input field and click 'Add'
102. To remove a tailor: Click the × button next to their name

The tailor list appears as a dropdown when creating or editing orders. Each order can be assigned to one tailor.

10.5 Users & Roles (Admin Only)

This section lets you manage who can access the system and what they can do.

Adding a New User

103. The new user must first register themselves using the app (create an account)
104. Go to Settings → Users & Roles
105. Find the user in the list (they will appear as 'Tailor' by default)
106. Click 'Change Role' and select their correct role
107. Click 'Save'

Changing a User's Role

108. Find the user in the Users & Roles list
109. Select the new role from the dropdown
110. Click 'Update'

Adding a Mobile Number for Mobile Login

111. Click the edit icon next to the user
112. Enter their 10-digit mobile number
113. Click 'Save'

10.6 Loyalty Program

Configure the customer loyalty rewards program:

Setting	Description
Enable/Disable	Turn the loyalty program on or off
Points per ₹100 spent	Default: 5 points for every ₹100
Order Bonus	Extra points when order is created (default: 10)
Delivery Bonus	Extra points when delivered (default: 20)
Redemption Rate	Default: ₹10 discount per 100 points
Minimum Redemption	Minimum points to redeem at once (default: 100)
Tier	Default Threshold
Silver Tier	Achieved at 500 points
Gold Tier	Achieved at 2,000 points
Platinum Tier	Achieved at 5,000 points

10.7 Account Settings

Each user can manage their own account in the Account section:

- Change Password — enter current password and new password
- Reconfigure Connection — if you need to connect to a different Supabase database

10.8 Bot / AI Chatbot (Admin Only)

Configure the built-in AI assistant that answers customer questions:

- Shop Hours — set your opening and closing times
- UPI ID — your payment UPI address
- Maps Link — Google Maps link to your shop
- Broadcast Message — a message shown to all chatbot users (for offers, announcements)
- Instagram Link — your Instagram profile link

 **Tip:** The chatbot can answer questions in Hindi (Hinglish) about your shop, pricing, services, and delivery times. Keep your shop information updated.

10.9 Appearance (Theme)

Click the  palette icon at the top right of the screen to change the colour theme of the app. Available themes include: Violet (default), Blue, Ocean, Teal, Green, Rose, Amber, and more.

 **Tip:** Your theme preference is saved on your device. Other users will not see your theme change.

The screenshot displays the Swaroop Threads ERP dashboard. At the top, there's a navigation bar with the Swaroop logo, status indicators (LIVE, ADMIN, connect), and various counters (2 Active, 0 Overdue, 0 Ready). A search bar and an 'Install' button are also present. The main dashboard area shows several key metrics: 'ACTIVE STITCHING ORDERS' (2 this month), 'BALANCE DUE' (₹430, 1 orders pending), 'REVENUE' (₹1,050, 2 orders this month), and 'OVERDUE' (0, All on track). At the bottom, there are three more metrics: 'CUSTOMERS' (1, 100% repeat), 'AVG ORDER' (₹525 per order), and 'COMPLETION' (0% delivered). A 'Choose Theme' modal is open on the right side, showing a grid of 16 color options: Violet, Blue, Ocean, Navy, Sky, Indigo, Midnight (selected), Teal, Green, Forest, Magenta, Rose, Coral, Amber, Gold, Crimson, and Slate. A message at the bottom of the modal states 'Theme is saved automatically'.

11. User Roles & Permissions

Roles & Permissions

Control who can do what in your system

11.1 Understanding Roles

Every person who uses the system is assigned a role. The role determines what they can see and do. This protects your business data and ensures each team member only has the access they need.

11.2 Role Descriptions

Admin

The shop owner or head manager. Has full access to everything in the system. Can create/edit/delete all orders, manage customers, record payments, view all reports, and manage users and roles.

Manager

A trusted senior staff member. Can do almost everything an Admin can, except manage users and roles. Cannot delete orders or customers.

Sales

A sales or front desk staff member. Can create and edit orders and manage customers, but cannot record payments or view financial reports.

Tailor

A tailor or production staff member. Can only see orders assigned to them and update the stage status. Cannot add, edit, or delete orders, and cannot see financial data.

11.3 Permissions Matrix

Permission	Admin	Manager	Sales	Tailor
Add New Orders	✓	✓	✓	✗
Edit Orders	✓	✓	✓	✗
Delete Orders	✓	✗	✗	✗
Record Payments	✓	✓	✗	✗
Edit Measurements	✓	✓	✓	✗
Change Order Stage	✓	✓	✓	✓
View Reports	✓	✓	✗	✗
Manage Customers	✓	✓	✓	✗
Delete Customers	✓	✗	✗	✗
Manage Users & Roles	✓	✗	✗	✗
View Dashboard	✓	✓	✗	✗
View Activity Log	✓	✓	✗	✗
Cost Estimator	✓	✓	✗	✗

11.4 Custom Permissions

Admin can customise individual permissions for any user. For example, you can give a Sales staff member permission to record payments by:

114. Going to Settings → Users & Roles
115. Clicking on the user's role settings
116. Toggling the specific permission on or off
117. Clicking 'Save'

⚠ Note: Custom permissions override the default role permissions. Use this carefully to grant exceptions.

11.5 What Tailors See

Tailor accounts see a simplified version of the system:

- Board view — showing all orders (they can filter to their own)
- Orders list — all active orders
- No Dashboard, Reports, Customers, Log, or Cost tabs
- Can only update the stage of orders — cannot edit any other details

💡 Tip: Create a Tailor account for each person in your workshop. They can update order stages from their own phone without seeing sensitive financial data.

12. Activity Log

Activity Log

Complete audit trail of all system actions

- User signed out** 06 Jun, 04:09 pm
 swarooponlinecare

12.1 What is the Activity Log?

The Activity Log records every action taken in the system — who did what, and when. This is your business's complete audit trail and is essential for accountability and dispute resolution.

12.2 What is Recorded?

- Order created, edited, or deleted
- Payment recorded
- Order stage changed
- Customer added, edited, or deleted
- Settings changed
- User signed in or signed out
- Cost sheet created, updated, or deleted

12.3 Reading the Log

Each log entry shows:

- Date and time of the action
- User who performed the action (their email)
- What action was taken
- Related order ID (if applicable)
- Additional details

12.4 Searching the Log

Use the search box at the top of the Log screen to filter entries by:

- User email
- Action type
- Date

 **Tip:** If you notice an incorrect entry in an order and need to find out who made the change, search the Activity Log by the order ID.

 **Note:** The Activity Log is read-only. No one can edit or delete log entries, not even the Admin.

13. Notification System

Notifications

Stay informed about important order updates

13.1 Notification Centre

Click the  bell icon at the top right to open the notification panel. It shows two types of alerts:

-  Urgent Orders — orders that are overdue or have been ready too long
-  Stage Updates — when any user moves an order to a new stage

13.2 Notification Badge

When you have unread notifications, a red badge shows the count on the bell icon. This badge updates in real time.

13.3 Acting on Notifications

Click on any notification entry to jump directly to the related order. The notification panel will close and the order will open.

13.4 Clearing Notifications

Click 'Clear All' in the notification panel to dismiss all current notifications. This does not affect the orders themselves — it only clears the notification list.

13.5 WhatsApp Notifications

The system can automatically send WhatsApp messages to customers when:

- Their order is received and confirmed
- Their garment is ready for collection
- Payment is confirmed

WhatsApp messages are triggered by clicking the WhatsApp button on the order panel. They use pre-written templates personalised with the customer's name and order details.

 **Tip:** Save the WhatsApp message templates in the order panel. They include the customer's name, order ID, and relevant information automatically.

14. Mobile Application Usage

Mobile Usage

Use Stitching Manager Pro on any device

14.1 Mobile-First Design

Stitching Manager Pro is designed to work perfectly on mobile phones. Everything — from creating orders to checking the board — works just as well on a small screen as on a desktop.

14.2 Installing on Your Phone

Android

118. Open the app URL in Chrome
119. Tap the three-dot menu (⋮) in the top right
120. Tap 'Add to Home Screen'
121. Tap 'Add' to confirm

iPhone (iOS)

122. Open the app URL in Safari
123. Tap the Share button (box with arrow)
124. Scroll down and tap 'Add to Home Screen'
125. Tap 'Add' to confirm

💡 Tip: After installation, the app opens full-screen without the browser address bar — just like a native app. It also loads faster.

14.3 Mobile Navigation

On mobile, use the hamburger menu ☰ at the top left to open the sidebar navigation. Tap any menu item to navigate. Tap anywhere outside the sidebar to close it.

14.4 Mobile Board

On mobile, the Board shows one stage column at a time. Tap the stage tabs at the top (Received, Cutting, Stitching, etc.) to switch between stages. Each order card is large and easy to tap.

14.5 Mobile Order Form

Creating an order on mobile is the same as desktop. The form stacks vertically for easy scrolling. All fields work the same way.

14.6 Offline Usage

The app works even without internet for reading data. When your internet connection returns, all changes automatically sync to the cloud.

 **Note:** When offline, you cannot create new orders or make changes. The app shows an orange offline banner at the top when there is no internet connection.

15. Best Practices

Best Practices

Get the most out of Stitching Manager Pro

15.1 Daily Routine

Morning

- 126. Open the Dashboard to see your day's overview
- 127. Check the Board for overdue orders (shown in red)
- 128. Brief your tailors — show each tailor their assigned orders
- 129. Check the  notification panel for any urgent alerts

Throughout the Day

- 130. Create new orders as customers come in
- 131. Update order stages as work progresses
- 132. Record payments as they are received

End of Day

- 133. Review the Board — confirm all stages are updated
- 134. Check the Balance Aging report for follow-up payments
- 135. Review new orders received today in the Dashboard

15.2 Order Management Tips

-  Tip: Always enter the mobile number accurately. This is how the system identifies customers and links their order history.
-  Tip: Use the Special Instructions field for anything unusual about the order — customer preferences, special stitching notes, or fitting issues.
-  Tip: Set realistic delivery dates. Overdue orders are highlighted in red and create urgency — only mark them overdue if they truly are late.
-  Tip: Assign each order to a specific tailor. This creates accountability and helps you track performance in the reports.

15.3 Customer Relationship

-  Tip: Take measurements on the very first order and save them. You will never need to re-measure a customer who orders the same garment type again.
-  Tip: Enable the Loyalty Program from day one. Customers who earn points are more likely to return.
-  Tip: Use the customer profile notes field to record personal details — anniversary dates, size preferences, favourite colours. This level of personalisation builds loyalty.

15.4 Financial Management

- 💡 Tip: Use the Cost Estimator for every new garment type to make sure your pricing is correct.
- 💡 Tip: Always record advance payment when taking an order — even a small amount creates commitment from the customer.
- 💡 Tip: Review the Balance Aging report weekly. Call customers with large outstanding balances before they become problematic.
- 💡 Tip: Export your monthly P&L report and save it. This is your business record.

15.5 Team Management

- 💡 Tip: Create individual accounts for each tailor. They can update their own order stages, which saves you time.
- 💡 Tip: Never share the Admin password. If a team member leaves, go to Users & Roles and remove their access.
- 💡 Tip: The Activity Log shows you exactly what each team member has done. Use it for weekly team reviews.

16. Frequently Asked Questions

FAQ

Answers to the most common questions

16.1 Account & Login

Q: I forgot my password. What do I do?

A: On the login screen, click 'Forgot password?', enter your email address, and click 'Send Reset Email'. You will receive an email with a link to set a new password. The link is valid for 24 hours.

Q: Can I use the same account on multiple devices?

A: Yes. You can sign in to the same account on your phone, tablet, and computer simultaneously. All data is stored in the cloud and stays in sync.

Q: My login is not working even though my password is correct.

A: Make sure you are using the correct email address. Check that Caps Lock is not on. If the problem persists, use the 'Forgot Password' option to reset your password.

Q: How do I add a new staff member to the system?

A: Ask the new staff member to register themselves using the app URL. They will start with the 'Tailor' role. Go to Settings → Users & Roles to change their role to Manager or Sales if needed.

Q: Can a user have two different roles?

A: No, each user has one role at a time. However, Admin can customise individual permissions to give a user specific extra abilities beyond their default role.

16.2 Orders

Q: I accidentally created a duplicate order. What should I do?

A: Open the duplicate order and click 'Delete'. Only Admin can delete orders. If you are not Admin, ask your Admin to delete it.

Q: Can I change the delivery date of an order after it has been created?

A: Yes. Open the order, click 'Edit', change the delivery date, and click 'Save Changes'. Any user with Edit Order permission (Admin, Manager, Sales) can do this.

Q: How do I move an order from 'Stitching' back to 'Cutting' if something was wrong?

A: Open the order panel, scroll to the stage buttons, and you can change the stage to any stage. There is no restriction on going backwards.

Q: What is the difference between 'Ready' and 'Trial'?

A: 'Ready' means the garment is fully finished. 'Trial' means the customer has come in for a fitting. Use 'Trial' before 'Ready' if you always do a fitting before the final handover.

Q: Can I assign an order to more than one tailor?

A: Currently, each order can be assigned to one tailor. If multiple tailors work on one order, assign it to the main tailor responsible.

Q: Can I print an order receipt?

A: Yes. Open the order from the Board or Orders list, click the ' Print' button in the order panel, and use your browser to print.

Q: An order is showing as 'Overdue' but the delivery date is correct. Is there a problem?

A: No — 'Overdue' means the delivery date has passed and the order has not yet been delivered. Advance the order to 'Delivered' or 'Paid ✓' once it is done.

Q: Can I search for all orders of one customer?

A: Yes. Go to the Customers tab, find the customer, and open their profile. You will see all their orders listed there.

16.3 Payments

Q: Can I record multiple partial payments for one order?

A: Yes. Each time you record a payment, it is added to the order's payment history. The balance updates automatically after each payment.

Q: A customer paid but the balance is still showing. What happened?

A: Make sure you clicked 'Save Payment' after entering the amount. Also check that the payment amount was entered correctly (numbers only, no ₹ symbol).

Q: Can I undo a payment that was recorded by mistake?

A: You can edit the order and adjust the advance amount. However, you cannot delete individual payment records. Contact your service provider if you need a payment reversed.

Q: Who can record payments?

A: Admin and Manager roles can record payments. Sales and Tailor roles cannot.

16.4 Customers & Measurements

Q: A customer's measurements are not auto-filling when I create a new order.

A: Make sure you are entering the same mobile number that was used when their measurements were first saved. The system matches customers by mobile number.

Q: I want to update a customer's measurements. How do I do that?

A: Open the customer's profile in the Customers tab and click 'Edit Measurements'. Or, when creating a new order, update the measurements in the order form — they will save to the customer profile.

Q: Can I delete a customer from the system?

A: Yes. Open the customer profile and click 'Delete Customer'. Only Admin can delete customers. Note that this only deletes the customer record — their past orders remain in the system.

Q: How many measurement fields can I add?

A: You can add unlimited custom measurement fields in Settings → Measurements. The default fields cover all common measurements.

16.5 Cost Estimator

Q: My cost sheet is not saving. What should I do?

A: Make sure the 'Product Name' field is filled in — it is required. All other fields are optional. Click 'Save Final' or '📄 Draft' to save.

Q: Can I use the same cost sheet for multiple orders?

A: Yes. Open the cost sheet and click the 'Duplicate' button to create a copy. You can then adjust quantities or prices for the new order.

Q: The profit percentage does not look right.

A: Check that all your costs are entered correctly. The profit percentage is calculated as: $(\text{Profit} \div \text{Final Selling Price}) \times 100$. In Percentage Mode, the profit is calculated on top of the total expense.

16.6 Reports

Q: Reports are not loading or are showing no data.

A: Make sure you are Admin or Manager — Tailor and Sales roles cannot view reports. Also check that there are orders in the selected date range.

Q: Can I export reports to Excel?

A: Yes. Every report has an 'Export Excel' button. Click it to download the report as an Excel file.

Q: The monthly report is showing different numbers than I expected.

A: Reports are based on order creation date. Check that the correct month is selected. Some orders may have been created in a different month.

16.7 Settings & Configuration

Q: I changed the Rate Card but old orders still show the old rate.

A: Rate Card changes only apply to new orders. Existing orders keep the rates that were set when they were created.

Q: Can I change the order stages? Can I add a custom stage?

A: The stages are fixed (Received, Cutting, Stitching, Ready, Trial, Delivered, Paid). Custom stages are not available in the current version.

Q: My shop name is not showing on printed receipts.

A: Go to Settings → Shop Profile, enter your shop name, and click 'Save & Sync'. The name should appear on all receipts after this.

Q: Can I use the app in Hindi?

A: The app interface is in English, but the AI chatbot supports Hinglish (Hindi written in English letters). Order-related communications via WhatsApp can be in Hindi.

16.8 Technical Questions

Q: Does the app work without internet?

A: You can view existing data without internet, but you cannot create or edit orders offline. The app shows a red/orange banner when there is no internet connection.

Q: Is my data secure?

A: Yes. All data is stored in your private Supabase database. Every user must log in to access any data. Sensitive data is never stored in plain text.

Q: Can multiple people use the app at the same time?

A: Yes. The app supports multiple simultaneous users. When one user makes a change, others will see it when they refresh or navigate to that page.

Q: The app is running slowly. What can I do?

A: Try refreshing the browser page. On mobile, close other apps running in the background. Make sure you have a stable internet connection. If the problem persists, clear your browser cache.

Q: Can I access the app on an iPhone?

A: Yes. The app works on all modern browsers including Safari on iPhone and Chrome on Android. For the best experience, install it as a PWA (Add to Home Screen).

17. Troubleshooting

Troubleshooting

Solutions to common problems

17.1 Login Issues

Cannot Log In

Symptoms: Password not accepted, error message on login

- Check that you are using the correct email address (exactly as registered)
- Make sure Caps Lock is not on
- Use 'Forgot Password' to reset your password
- Check your internet connection — login requires internet
- Try opening the app in a private/incognito browser window

App Shows Loading Screen but Never Opens

Symptoms: Spinning loader, app does not load

- Refresh the browser page (press F5 or Ctrl+R)
- Check your internet connection
- Clear browser cache and cookies (Settings → History → Clear browsing data)
- Try opening in a different browser
- Contact your service provider if the issue persists

Mobile Login Not Working

Symptoms: Mobile number is not accepted

- Make sure your Admin has added your mobile number in Settings → Users & Roles
- Enter only 10 digits without country code or spaces
- Confirm the mobile number matches exactly what Admin entered

17.2 Order Issues

Orders Not Showing on Board

Symptoms: Board appears empty or some orders missing

- Check if a filter is active (tailor filter, date filter). Click 'Clear Filters' to reset
- Make sure the correct stage tab is selected on mobile
- Refresh the page to sync latest data
- Check your internet connection

Cannot Create a New Order

Symptoms: Button is greyed out or error message appears

- Check your role — Tailor role cannot create new orders
- Make sure all required fields are filled (Name, Mobile, Delivery Date, at least one garment)
- Check your internet connection — creating orders requires internet

Measurements Not Auto-Filling

Symptoms: Previous customer's measurements not appearing

- Verify the mobile number entered matches exactly what was used before
- Check the customer profile to confirm measurements are saved
- Measurements only auto-fill if the customer already has them saved

17.3 Payment Issues

Payment Recorded but Balance Not Updating

Symptoms: Balance still shows the old amount after payment

- Refresh the page
- Re-open the order to see the updated balance
- Make sure the payment was actually saved (click 'Save Payment')

17.4 Report Issues

Reports Showing No Data

Symptoms: Reports are empty or show zero

- Confirm your role is Admin or Manager (Tailor/Sales cannot view reports)
- Check the date filter — make sure the selected period has orders
- Try changing to 'Monthly' view and selecting the current month

17.5 Performance Issues

App Running Slowly

Symptoms: Pages take long to load, buttons are slow

- Check internet connection speed
- Refresh the browser page
- Close other browser tabs to free up memory
- On mobile, restart the app
- Clear browser cache (browser Settings → Privacy → Clear Cache)

17.6 Print Issues

Order Receipt Not Printing Correctly

Symptoms: Receipt is cut off, missing information, or format is wrong

- Make sure the shop name is set in Settings → Shop Profile
- In the browser print dialog, set 'Margins' to 'Default' or 'Minimum'
- Set 'Scale' to 100% in the print settings
- Enable 'Background graphics' in print settings to show colours

17.7 General Tips

- 💡 Tip: If something unexpected happens, try refreshing the page first. Most temporary issues are resolved by a simple refresh.
- 💡 Tip: Keep your browser updated to the latest version for the best performance.
- 💡 Tip: If an error message appears, note down the exact text and contact your service provider — it helps them diagnose the problem faster.
